

VERITECH – WEB DEVELOPMENT INTERN

TASK – 1

NAME: R. PRANATHI

TASK: Responsive company member team page.

The goal of this project is to create a responsive web page for a fictional company, Techno Solutions, to showcase its team members and their roles within the organization.

Technologies Used:

- HTML (Hypertext Markup Language): Used for structuring the content of the web page.
- CSS (Cascading Style Sheets): Used for styling the HTML elements and making the web page visually appealing.
- Images: Actual or placeholder images are used to represent team members.
- The project can be extended by adding more features such as hover effects on team member cards, clickable links to individual profiles, or integrating with a backend to dynamically fetch team member data.
- Accessibility features like providing alternative text for images and ensuring keyboard navigation can also be implemented to make the website more inclusive.

By following this project explanation, you'll be able to create a functional and visually appealing Company Member Team Page for Techno Solutions using HTML and CSS.
